Multi-Beam angle

When the lights develop into such a stage as being able to provide the rider with sufficient lightning, you would discover that the real adventure begins after sunset! Riding a bike with these lights will make you feel as if you are traveling through a tunnel of light. BAOCH LED Bicycle Light Systems provide you with a great new experience.

BAOCH bike lights provide you with diverse groups of products ranging from 450- 1,200 Lumens in brightness. With its CNC mechanically manufactured aluminum alloy covers, it is lightweight, durable, and reliable. Our line of bike lights provides you with bright lighting for your night riding experiences. Through our innovative designing methods and techniques, the benefits of the using LEDs are maximized while reducing the heat generated from the lights. Our LED units are selected for its 5600K color temperature so they can brightly illuminate the roads ahead. Our multi-beam angle lights are designed to increase the depth and the range of the lightning, which is over 100 meters. Our products provide remarkably strong lights that use small amounts of electricity (1-16W).

By choosing BAOCH bike lights, you will enjoy a night ride with a special sense of adventure provided by the novelty of modern science and adventure. Don't hesitate! You will have completely new discoveries and see what you haven't been able to with brighter lights!
