

BAOCH

H3

Headlamp

OWNERS MANUAL

Technical data

Light output : 180 lumen.

Battery life : 10 hours

Battery life varies according to battery age and condition, as well as ambient temperature.

Battery capacity / nominal voltage :

2600 mh / 7.4 V Li-Ion
Charging time : 3-5 hours.

Charger Wiesel :

Input voltage : 100 – 240 V~, 50 – 60 Hz

Charging current : up to 0.8 A

Compatible batteries : Li-Ion 7.4 V

Display led : charging red • full green

Important

The laws governing the allowable application domain for this lighting system may vary from one country to another. We recommend that you inform yourself about the relevant laws in this domain in your country.

Warning

Avoid looking directly into the light emitted by the light or shining the light into your own eyes or the eyes of another person. If the light accidentally shines into your eyes, close your eyes and move your head out of the light beam. Do not use any strongly focusing optical device to look at the light beam. In cases where the light is used in a public or commercial setting, users should be provided with training concerning the safety measures for laser light.

Water resistance

All BAPOCH headlamp components are waterproof and can of course be used under extremely severe conditions. However, the BAPOCH headlamp is NOT a diving lamp and is NOT suitable for use under water.

Transport:

Always disconnect the battery from the light! Otherwise the small amount of power used by the electronics will discharge the battery, and the lamp may be switched on accidentally. The consequent uncontrolled heat buildup could cause a fire or melt adjacent plastic material.

Storage

If you intend not to use the lamp for a longer period of time, fully charge the battery and leave it connected to the charger. For storing, we recommend a cool and dry place.

Warranty

The product's one year warranty applies to all components, as well as any manufacturing defect. The warranty does not include the battery, however. In addition, any modification or improper use of the product will void the warranty.

Heat generation

Our BAOCH headlamp is not a flashlight. The housing may heat up; so make sure that you always keep the light at a safe distance to any combustible or flammable materials. Could cause fire or death! However, quiescent operation (without cooling the light housing via airflow or the like) is possible at any time and will not damage the product.
